

## SUMMARY

I consider myself a novice trying to get out of Dunning-Kruger's Valley of Despair, an individual who is intellectually curious and passionate about making even the slightest meaningful impact. I have been working in the industry for over four years, focusing on Information Extraction on business documents using techniques from Computer Vision and Natural Language Processing. However, my research interest does not lie within said domains. I am open to any interesting topic as I am driven by the urge of contributing to the greater good and am easily intrigued by technological novelty.

- 4 years of experience in AI/DL, mostly focused on Document Image Understanding.
- 1 year of experience in Data Science, focused on geophysical data.
- Co-authored 3 papers on Information Extraction.
- Bachelor of Computer Science - Highest Ranking Graduate.
