

I consider myself a novice trying to get out of Dunning-Kruger's Valley of Despair, an individual who is intellectually curious, passion-driven and eager to make meaningful impacts. I have been working in the industry for over 4 years, focusing on developing AI solutions for Key Information Extraction from business documents. However, my interest does not lie within said domains and I am open to any interesting topic/problem. I am looking for opportunities where I could stay current with the literature, develop and implement AI solutions that people enjoy using.

PUBLICATIONS

EDUCATION

Bachelor Degree, Computer Science (Honours Programme)

University of Engineering and Technology - Vietnam National University, Hanoi

GPA: 3.83/4.00

- Highest Ranking Graduate.

HONOURS AND AWARDS

Best Paper Award

Sep 2021

ICDAR 2021, Workshop on Document Images and Language

Paper title: [A Span Extraction Approach for Information Extraction on Visually-Rich Documents](#)

Accepted for oral presentation and awarded the Best Paper Award at Workshop on Document Images and Language, ICDAR 2021.

Certificate of Highest Ranking Graduate

Aug 2020

University of Engineering and Technology - Vietnam National University, Hanoi

Awarded to students graduate with the highest GPA amongst the graduating class.

Certificate of Merit for Excellent Graduation

Aug 2020

Vietnam National University

Awarded by the President of Vietnam National University, Hanoi to students with excellent academic performance and level of conduct during a 4-year undergraduate programme.

Certificate of Excellent Thesis Defence

Aug 2020

University of Engineering and Technology - Vietnam National University, Hanoi

Awarded to the best thesis of the Undergraduate Thesis Defence Committee.

Thesis title: A Layout-aware key-value relation predicting model for document images.

Certificate of Excellent Student

2016 - 2020

University of Engineering and Technology - Vietnam National University, Hanoi

Awarded annually to students with excellent academic performance and level of conduct.

3 times awarded.

Academic Encouragement Scholarship

2016 - 2020

University of Engineering and Technology - Vietnam National University, Hanoi

Awarded to top 8% student every semester on the basis of academic performance and extracurricular activities.

4 times awarded, 6 times nominated.

Top 4 Zalo AI Challenge 2018 - Voice Track

Sep 2018

Zalo, VNG Corporation (Individual participant)

Finished at 4th place on the Private Leaderboard of the Voice Gender/Accent Classification challenge.

[Zalo AI Challenge 2018](#) is a Kaggle-like competition hosted by Zalo - one of the biggest tech companies in Vietnam. The competition attracted over 700 teams competed in 3 challenges.

Akira Scholarship

Nov 2017

Akira Education

A Japanese Language education scholarship awarded to students with excellent academic records.

EXPERIENCE

AI Researcher/Engineer

Nov 2018 — Present

Cinnamon AI

Hanoi, Vietnam

-
- Researched, developed, and implemented AI solutions for client projects and internal usage.
 - **Co-authored 3 peer-reviewed papers** on Key Information Extraction.
 - **Developed AI solutions for Key Information Extraction on document images of a low-resource language:** Implemented MVLM pre-training task for LayoutLM (and variants), adapted the English pre-trained weights to a low-resource language (Japanese), pre-trained and fine-tuned it on several client data sets, which **increased the f1-score by 2% - 7%.**
 - **Developed solutions for localizing and extracting documents from scanned images containing multiple documents** using Image Processing techniques and Deep Learning models, **achieved 85%+ IoU score.**
 - **Worked on Document Image Classification, over 85% accuracy** achieved on a client data set with **20+ classes.**
 - **Worked on Object Detection on Document Images:** such as detecting logos, stamps, check marks, etc.
 - **Performed Data Synthesis/Augmentation** using image processing techniques for overcoming data shortage.
 - Other: Benchmarked internal AI solutions, Text Segmentation, printed/handwriting OCR, handled AI pipeline on client projects, contributed to several internal libraries.
 - Contributed to designing and developing data-driven products and processes.
 - **Developed synchronization and local version control features** for the CLI tool, used by AI Engineers and Researchers to query data from a central database and manage the local copy.
 - **In charge of data-related objectives on the department road map:** lead discussions, identify issues, propose solutions, decide action items for data centralization, data management, data integrity, labeling UI improvement, central database design, etc.
 - **Taking part in revamping the internal data management system:** Develop a new standardized label format, redesign database schema, develop data sharing hub.
 - **Initiated and took charge of data standardization:** defined and implemented processes regarding data life cycle and organization, enabling data sets from different client to be re-useable collectively.
 - Other tasks: Supporting cross-department alignment; Conducting/Facilitating technical sharing sessions; Training/Mentoring;.
 - Tools and technologies
 - Mainly used: **Python, Pytorch, Tensorflow/Keras, Transformers (Hugging Face), Git, OpenCV, Scikit-learn IAT_EX.**
 - Also familiar with: DVC, Neptune, CircleCI, Jenkins, Docker, KubeFlow, Elasticsearch.
 - Environments: GCP, AWS, Linux, Windows.

Undergraduate Research Assistant

Aug 2017 — Sep 2019

IOT Lab, University of Engineering and Technology - Vietnam National University, Hanoi

Hanoi, Vietnam

- Worked on the [Well Insight platform](#) 
 - **Built predictive models for geophysical data** using machine learning and statistical methods.
 - Contributed to the Machine Learning module of the Well Insight platform.
 - Worked on: Facies/rock type classification; Time series prediction on well-logs data; Permeability regression; Integrated Prediction Error Filter Analysis (INPEFA) curve calculation; Cumulative and Federated learning for well-logs data.
- Tools and technologies: Python, Keras/Tensorflow, OpenCV, Scikit-learn, XGBoost, Javascript.

PROJECTS

Data Utility Improvement Experiment for DECAF

Oct 2022 — Nov 2022

Personal research

- Studied about Causal Inference, Algorithmic Fairness and specifically the paper [DECAF: Generating Fair Synthetic Data Using Causally-Aware Generative networks](#).
- Conducted experiments on improving data utility of the DECAF method using alternating graph during synthesis while still achieving similar level of fairness.
- Gave discussion and suggestions on the choice of data utility metrics.

Voice Gender/Accent Classification

Aug 2018 — Sep 2018

Zalo AI Challenge 2018

- **4th place** on the Private Leaderboard, achieved **79.208% accuracy**.
- Individual participant, participated only during the last 10 days/1 month+ of the competition.
- Problem description: Classify the speaker's voice in a recording (typically under 3 seconds) by gender(male/female) and regional accent (northern/central/southern).
- About the competition: Zalo AI Challenge 2018 is a Kaggle-like competition hosted by Zalo - one of the biggest tech companies in Vietnam. The competition attracted over 700 teams competed in 3 challenges.

Electric Meter OCR

Oct 2019 — Nov 2019

University Coursework Project

- Achieved **0.08 on edit distance** while having the size of just **under 10MB** and processing time of under **0.3 seconds** per image on a normal laptop.
- Problem description: Extract the value on the dial from images of electric meters. The solution is meant to be used in embedded hardware.

OUTREACH

Cinnamon AI Global Bootcamp 2022

Mentoring

- Mentored a group of 4 students. The team eventually won the 2nd prize for their graduation project.
- (These kids are amazing, far more gifted than I could ever be.)
- Contributed to syllabus design, contributed questions to the entrance test, interviewed candidates.

Cinnamon AI Taiwan Bootcamp 2020

Teaching/Mentoring

- Prepared materials and gave lectures on Language modelling and Transformers to a class of 15 students, most of them hold a Master degree or are Master students. Also mentored a group of 3.
- Contributed to syllabus design, interviewed candidates.

SKILLS

Programming	Python, Git, \LaTeX , Markdown, Java, C/C++, SQL, SPRQL.
Tools and Library	Pytorch, Transformers (Hugging Face), Tensorflow/Keras, Notebook, Github, OpenCV, Scikit-learn, Docker, LibROSA.
AI Domains	Information Extraction , Document Intelligence, Document Understanding, Data Science, Natural Language Processing, Computer Vision.
Environments	GCP, AWS, Linux, Windows.
Languages	Vietnamese (native), English (fluent), Japanese (JLPT N4).
Misc	Problem Solving, Attentive to detail, Presentation, Communication, Academic Research (Google Scholar profile).
